

Expense Management for Businesses and Organizations

Control spending and save your team's time with smart
expense management from ExpenseBot

Fast and powerful expense management software.

ExpenseBot is the easiest way for your company to track, control, and analyze employee spending.

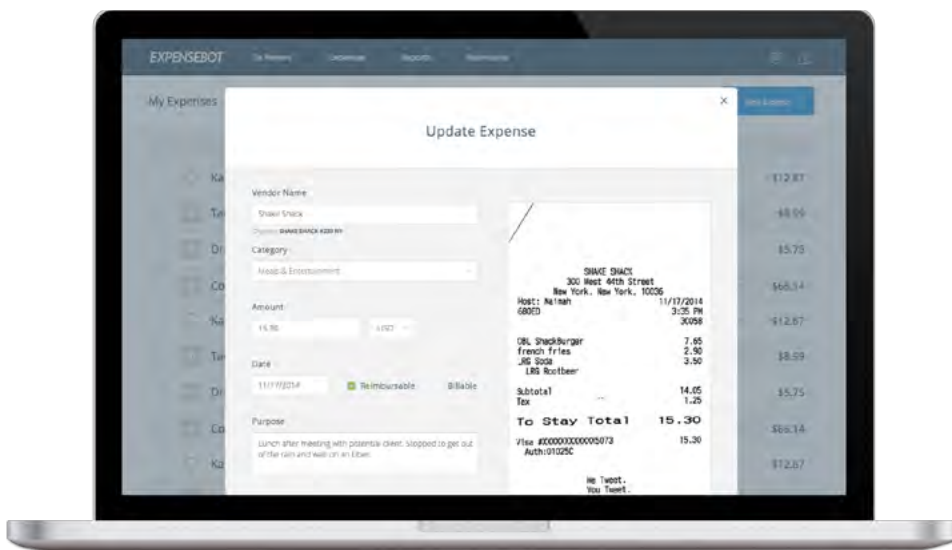

Our smarter expense reporting process creates expense reports for users automatically, saving hours every month for employees and payables teams.

Expense Reporting Automation Saves Time & Money

Expense reports don't have to be a hassle. With the right tool, your company can move from an outdated, inefficient process to one that your team will love! Whether you're using spreadsheets to process reimbursements, relying on corporate credit cards to keep track of spending, or even have an earlier-generation expense management software, ExpenseBot can help make your team happier and more efficient.

ExpenseBot securely integrates with more than 15,000 banks and credit cards to eliminate data entry and automatically generate expense reports as you spend!

ExpenseBot's automated receipt RoboScan process utilizes optical character recognition with human verification to maximize accuracy and minimize the time spent manually entering data. ExpenseBot can even match your receipt items with credit card charges automatically to get your expense report done faster!

For Your Organization

Save Money

Automatic expense reporting greatly reduces time spent on the process. Improved compliance to spending policies boosts efficiency of spend.

Gain Insight

Improve accuracy of expense reports and get better insight into where spending can be better targeted for return.

Take Control

Encourage good spending decisions with spending policies and data requirements on expense reports.

For Your Team

Save Time

Expense reports are quicker, more accurate, and require less effort. Reduce administrative and boost focus.

Be Happier

ExpenseBot's easy to use web interface and mobile apps guarantees higher adoption and happier staff!

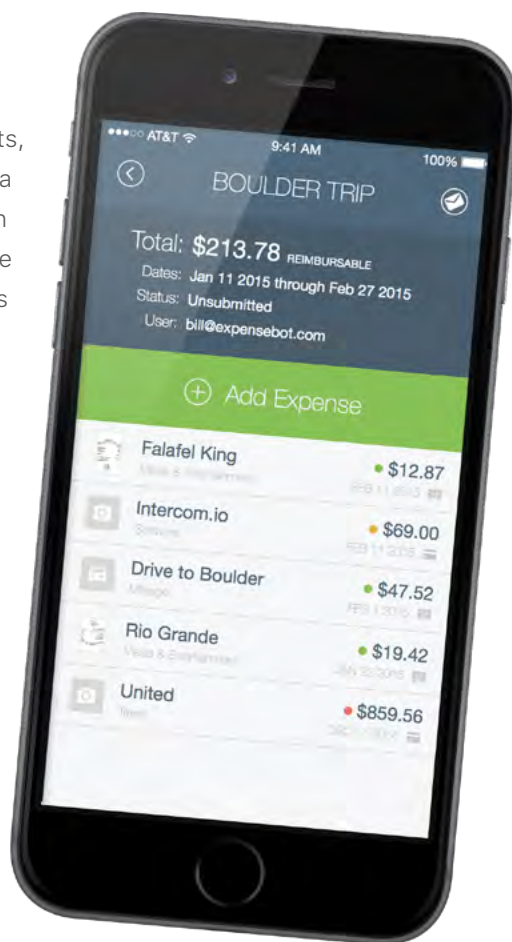

Mobile Expense Management Boosts Efficiency & Accuracy

The best time to do your expense report is while you're traveling! With ExpenseBot's easy to use mobile clients, you're always ready to take a photo of a receipt, check on the latest charges on your corporate card, turn in an expense report, or even approve one that needs your review!

ExpenseBot dedicated months of usability testing and design to make our mobile offerings the easiest to use on the enterprise expense management market today. You and your team will appreciate the speed with which you can take care of business so that you can get back to closing deals.

Mileage tracking has never been easier with ExpenseBot's built in mobile mileage tracking. Your managers can review expense reports on the go and approve them with the tap of a finger. Even employees without smartphones can stay productive on the go by forwarding images of receipts to receipts@expensebot.com as they spend.

Take advantage of downtime while traveling and keep your team's expense reports as up to date as they can be. Try ExpenseBot and see how easy expense reports can be!

For Your Organization

Real Time Expenses

Mobile expense reporting allows for quicker turnaround on reports and ensures that they'll be in when you need to close the books.

Boost Accuracy

Doing their expense report as they spend allows your team to provide more accurate information.

For Your Team

Save Time

Use downtime while traveling to complete expense reports and save valuable productive time for closing deals.

Be Happier

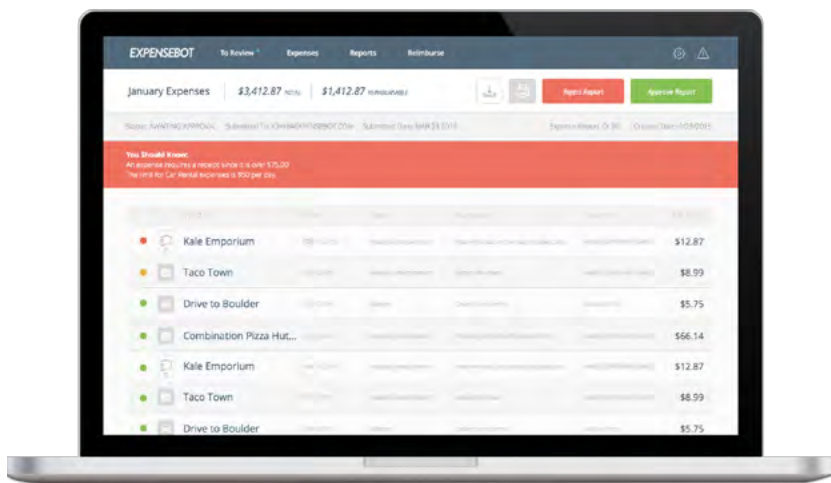

Who likes being stuck at their desk? Boost morale and let your team do their expenses when and where they want!

Stop Losing Receipts

Receipts are the bane of a traveler's life. With ExpenseBot you can snap a picture and toss it!

Control Spending & Maximize Efficiency of Processing

Discretionary spending is the number two expense behind payroll for most businesses. ExpenseBot can help your organization gain greater control over your spending quickly and simply with our structured and efficient process.

Easy to set up spending policies allow you to set periodic limits on the amount an employee can spend on a particular category. This ensures that overzealous spending or inaccurate information is quickly identified and corrected. Violations can be flagged as simple warnings visible by the user and their approver, or can be implemented as "strict" policies that remove the ability to submit the report until it's been corrected. Employees can be required to include business purpose, attendee, and other data, as well as attaching a receipt before their expenses can be submitted as well.

Once submitted, expense reports are automatically forwarded to the correct approver based on an unlimited tiered approval tree approach. The approver can review the information on the report and approve or reject if from their phone, the email alert they received, or right from the ExpenseBot web app.

For Your Organization

Tighten Controls

Put structure into your approvals and reimbursements. Ensure compliance to your prescribed process automatically.

Cut Overspending

Spending policies encourage smarter spending and add teeth to the guidelines you may have already established.

Identify Fraud

Identify duplicates, typos, and accidents quickly while keeping an eye out for fraud with ExpenseBot's automatic audits.

For Your Team

Save Time

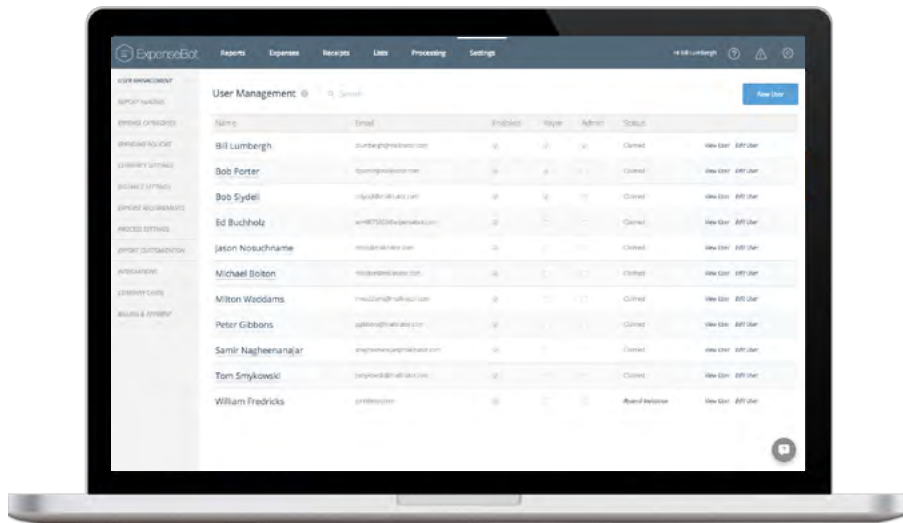

Approvers don't need to hunt down receipts or look up policies, ExpenseBot provides all the data they need!

Be Happier

Reimburse employees quicker and boost team morale while getting the books closed quicker and more accurately.

Maximize Data Security & Employee Privacy

ExpenseBot adheres to a framework of processes and controls that protect ExpenseBot customer information from unauthorized access and ensures that ExpenseBot's applications & services operate to meet the service levels customers demand. ExpenseBot's best practice security processes, high-granularity access control, audit logs, vulnerability management, security scanning and continuous monitoring deliver confidentiality, integrity and availability to clients, all backed by best-in-class security policies, process architecture and third party audits.

In addition to employing best-in-class security processes, state-of-the-art technology and hosting facilities, ExpenseBot relies on a unique combination of exceptional personnel, defined business processes, and external intrusion audits against a variety of international and U.S. standards to deliver a level of security and confidence unmatched in the industry.

Physical Security

ExpenseBot's expense management solutions are based on a high availability architecture with no single point of failure and collocated in a number of Tier 4 data center facilities in geographically separate locations. The data centers undergo twice-annual SAS70 Type II audits and to gain assurance that these data centers are maintained properly

User Data Privacy

ExpenseBot collects only the minimum necessary personally identifiable information (PII) and uses it only for stated purposes. Sensitive information including PII is encrypted when transmitted and stored on ExpenseBot systems. PII is transmitted to third parties only when specifically required to provide agreed upon business services. PII is never used for marketing or other purposes.
